Introduction

May 2001 CRCB

Doug Gardner
DII COE Chief Engineer

9 May 2001

Action Items Planned for Closure During Today's Meeting

- **00-011 - Brief ASD(C3I) on the output of the Directory Services Advisory Group effort**
- **01-001 - AOG to develop risk management criteria for removing JRE's and provide recommendations to the CRCB**
- **01-003 - COE to provide white paper on end-to-end COE IAVA management process**
- **01-005 – COE to develop and publish priorities for development of 4.5, 4.6, and 4.7 releases to ensure baseline remains stable for planned system fielding schedules**

Action Items That Will Remain Open After Today's Meeting

- **99-023 - DISA Present 36-month Plan Update**
  - **Next update scheduled for July 2001 CRCB**
- **00-017 - Work through the AOG to determine if current realtime extensions plus POSIX 54-to-52 interface software fits within COE guidelines**
  - **White Paper still in coordination**
  - **Presentation to CRCB in July**

Action Items That Will Remain Open After Today's Meeting

- **00-020 - Provide plan for development/acquisition of additional COE infrastructure to support realtime applications**
  - **Planning is on-going**
  - **Initial presentation to CRCB in July**
- **00-021 - Development plan (schedule and testing process) for the integration of the visualization framework and C/JMTK**
  - **Effort will not even begin until C/JMTK contract action is complete**

Action Items That Will Remain Open After Today's Meeting

- **01-002 – COE to work with Joint Staff (J6-K) to coordinate the JRE risk management strategy**
  - **Risk management strategy briefed to CRCB today**
  - **Coordination with J6-K has begun**
  - **AI will remain open until MOU established between DISA and JS regarding proposed risk management strategy**

Action Items That Will Remain Open After Today's Meeting

- **01-004 – COE to provide rationale copies of SEWG responses to PEO interchange actions to CRCB**
  - **PEO A/I #14: "Provide information brief to PEOs on details of symbology sets/libraries, where they are being used, and how the infrastructure supports them."**
    - **Requested brief not yet presented**
    - **PEOs understand and agree with rationale for supporting multiple symbol sets (gradual transition to MIL-STD-2525B)**
    - **PEOs want to know the universe of symbol sets and the extent to which Joint segments will support required symbol sets**

Action Items That Will Remain Open After Today's Meeting

- **01-004 (Concluded)**
  - **PEO A/I #15: "Lay out schedules and identify where there are version synchronization, architecture, and interdependencies issues."**
    - **PEOs looking for more detail on Joint segment developmental dependencies with systems**
    - **PEOs also looking for actual interoperability synch issues between systems (due to USMTF, CST versions, etc.)**
    - **Plan to work this action during May**

DII COE Release 4.4

- Released 6 April 2001
- CD Content included:
  - Kernels 4.2.0.0 (Solaris 7/8, NT) and 4.2.0.3 (HP-UX 11.0, Windows 2000 Professional)
  - Kernel Patch 4.2.0.0P4 for all OSs
  - ICSF 4.4.0.0
  - Other approved segments (250)
- Separate CDs for each OS (Solaris 7, Solaris 8, HP-UX 11.0, Windows NT, Windows 2000 Professional)

DII COE Release 4.4

- **10 April 2001: notified AOG that 4.2.0.3/4.2.0.0P4 kernel runs unchanged on Windows 2000 Server and Advanced Server**
  - **Documentation update only**
- **30 March 2001: Realtime Kernel Services v1.0.0.0 was delivered**

Upcoming Deliveries

- **Complete kernel documentation for Windows 2000 Server and Advanced Server**
- **Work continues on security and directory services issues**

Upcoming Deliveries

- **Kernel Delivery Schedule**
  - **31 July (tentative) 4.2.0.5/4.2.0.0P5**
  - **Contents include:**
    - **Remote kernel installation**
    - **Enhanced support for network segment installation**
    - **Initial support for remote segment installation (framework for integration with products like Tivoli/SMS/CA Unicenter)**
  - **Supported OSs include Windows NT; Windows 2000 Professional, Server and Advanced Server; Solaris 7 and 8; and HP-UX 11.0**

Upcoming Deliveries

- **ICSF Delivery Schedule**
  - **1 June 4.4.0.0P1**
  - **27 July 4.4.0.0P2**
  - **7 September 4.5.0.0**
